Queen Victoria Combination Covers

This week we have compiled a tailored list of mixed franking covers from our stock of Queen Victoria postal history. More often than not these covers would include several different denominations to add up to the rate of postage via a certain route to an overseas destination but there may well have been extra charges on certain covers including late fees and registration fees. Due to the nature of these covers requiring multiple stamps of different denominations, this would often result in some quite stunning colour combinations that are visually very appealing.
